

HIGH EFFICIENCY BOILERS & ACCESSORIES

BUILT TO LAST

Rated on

Excellent

“

Just received our first gas bill after the ATAG was installed and it's 20% cheaper than our old boiler! Great investment for us!”

Erin May

“

Very impressed with our new boiler. It's quiet, efficient and has the ability to serve two showers simultaneously. The weather compensation system not only helps us reduce our gas consumption, but it also ensures a constant ambient temperature in our home. Would highly recommend.”

Mr McKay

“

As a heating engineer, I've fitted many brands of boiler and ATAG in my opinion is the best out there for domestic clients. These are the only boilers I recommend. I've fitted one in my Mum's and my own house too.”

Phil Finchett

The **reliable** and **responsible** boiler for your home

Buying a new boiler is a considerable investment and you need to be sure it's going to keep you warm for years to come, that's why all ATAG boilers come with a ten year warranty as standard, with options to extend up to 14 years.

As well as the longest warranty on the market, our Economiser is the most efficient boiler available in the UK and Europe, thanks to our unique innovation, which results minimal wasted energy, you could save up to £320* on your annual gas bills.

When you choose ATAG, you are also making the best choice for the environment. All gas boilers produce Nitrogen oxide and these gases are harmful to the environment. However, we're proud that our boilers have the lowest NOx levels in Europe which means they're kinder to the environment than any other boiler available in the UK.

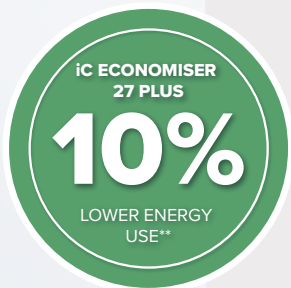

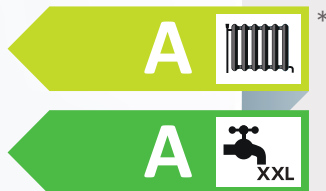

At ATAG, we're conscious of environmental issues and are aware we have our role to play in the sustainability of the planet. As well as making highly efficient boilers, 95% of our boiler packaging is recyclable and completely plastic free.

Throughout the world, ATAG boilers are installed in large commercial buildings as well as domestic properties and they are trusted to deliver unrivalled performance, efficiency and supreme reliability. In addition to winning numerous global awards, UK consumers also rate ATAG the number one boiler manufacturer on independent review site Trustpilot.

— ULTIMATE EFFICIENCY — **iC Economiser Plus** Combination boilers

Inside each ATAG Economiser Plus combination boiler, there is a revolutionary device which recycles lost heat. In doing so, it protects the environment while helping to save up to £320 a year on your annual gas bills.**

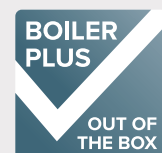

Due to its built-in Passive Flue Gas Heat Recovery Device (PFGHRD) in the same compact casing which is unique in the UK, the ATAG iC Economiser Plus is the only boiler that exceeds all Boiler Plus requirements without having to purchase an expensive add-on.

What's more all of our boilers offer energy efficient solutions that also help to save money on your annual gas bills too.

iS System

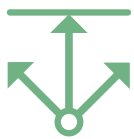

High efficiency boilers

System boilers are traditionally installed with an unvented hot water cylinder which provides an increased capacity of hot water.

The fact that the in-built ErP pump and controls are contained within the boiler casing counts towards a simple and space saving solution. And ensures your boiler is as energy efficient as possible, saving you money year-on-year.

Key features and benefits
